To: **Contracting Officer**Subject: **Contract SP-1914**

Enclosed is an Application For a Necessity Certificate (in order to obtain permission for accelerated depreciation). The [redacted] worth of facilities which are the subject of the application are exclusively for SP-1914 [redacted] and consist exclusively of equipment and other facilities at the Bakersfield plant (Unit 80).

25X1

Pursuant to security instructions, details as to the required use of each item (always required and specified in our normal Applications for Necessity Certificates) cannot be divulged. Consequently, see our Note 1 on page 2 of the enclosed Appendix A-119. The general information supplied in the Application Form is based upon our overall California plant, which is the way we present our normal Applications. In the Appendix, however, we are normally required to remark, against each item, what its usage will be and for what model. The only thing we feel we can state in this connection is along the lines of the above mentioned Note 1.

In light of the circumstances, we have concluded that we should not submit this Application directly to O.D.M. (which is normal practice and which we are now doing with a separate application covering [redacted] worth of facilities for normal projects). We felt, rather, that we should forward this application through you, with the further thought that the Air Force perhaps could deliver it to appropriate personnel of O.D.M. with some certification and explanation which would satisfy the requirements of O.D.M. prerequisite to their approval; and arrange that it not get into normal channels. In any event we presume that Jerry can utilize some means to handle the matter so as appropriately and properly to satisfy O.D.M.'s requirements for justification.

Needless to say, if further information is desired from us we will be glad to supply it to you.

Three copies of the application and 6 copies of the Appendix are required by O.D.M. We have enclosed one additional copy of each.

25X1

Yours truly,

Bob Original + attachments
